Sudoku Carve
Logic Puzzle

PITCH DECK · NOVEMBER 2026

Sudoku, with characters instead of numbers.

Same logic. New magic. A free-to-play mobile puzzle game, recently launched on iOS and Android.

iOS + Android | Free to play | Live in the stores

Eduplica · a brand of Shabake OÜ, Estonia

THE HOOK

Sudoku has looked the same since 1984. We gave it a face.

- **One idea, understood in a second.**
  Swap the nine digits for nine characters. The rules and the logic stay exactly the same.
- **It removes the "maths" barrier.**
  Sudoku is a logic game, but numbers make many people feel it is not for them.
- **Players make the board their own.**
  Any digit can be an animal, a food or a number, cell by cell.

THE GAME

A complete sudoku game, live today.

3,600+

Arcade levels

2 worlds, 17 chapters each: Animal Planet and World of Flavors.

50

Characters to collect

25 animals and 25 foods.

4

Classic difficulties

Easy to Very Hard. Every grid has a Puzzle ID to share.

Daily

Reasons to come back

Daily puzzle calendar, 7-Days Challenge and daily rewards.

WHY IT STANDS OUT

Every sudoku app sells the same grid. Ours has content.

A wider audience

Characters make the first puzzle friendly for people who never tried sudoku. Smart hints, planned next, will show the next move and explain why it works.

Collectible sets

Each character set is new content for the same puzzles: themes, seasons and events without building new mechanics.

Made for partners

A set can be drawn for a brand, a region or a community, and offered to that audience inside the game.

MARKET

An evergreen genre that buyers pay for.

$1.2bn

paid by Miniclip for Easybrain, the maker of Sudoku.com

Announced in November 2024, all cash. Embracer Group had bought the same company in 2021 for $640 million.

- **Sudoku does not go out of fashion.**
  The same puzzle has been played for four decades.
- **The leading apps offer the same product.**
  Numbers on a grid, with little to tell them apart.
- **Low content cost, global by design.**
  No story, no voice, almost no text to localise.

Source: Miniclip / Embracer Group acquisition announcement, 21 November 2024 (reported by GamingonPhone and others).

BUSINESS MODEL

Free to play, with ads and in-app purchases already live.

Ads

Google AdMob on iOS and Android. New players see no forced ads in their first sessions.

In-app purchases

Mosanite, the in-game currency, plus a Premium Pass: double Mosanite, no ads and instant rewards.

Content to sell

Character sets, seasonal themes and events give players something new on a regular basis.

NEXT FOR THE PREMIUM PASS

Smart hints

One tap shows the next move and explains why it works, using the player's own characters. It teaches the game and gives players a stronger reason to get the Premium Pass.

ROADMAP

Shipping every few weeks since launch.

Shipped in 2026

- Guided tutorial and a new puzzle generator
- Big redesign: new home, Daily Rewards, chapters, account link
- New first-time experience and easy levels (v1.0.92)
- Store listing translated for Google Play

In progress

- Flower character set
- Christmas character set
- Dark mode theme
- First-session improvements

Next

- Smart hints, for Premium Pass players
- Race events
- New themes
- Partner and regional sets
- Monetisation tuning

TEAM AND COMPANY

A lean team of two that ships.

Who builds it

- **Ramy Alkharrat, founder.**
  Product, game design, UX and UI, marketing and business.
- **Lead developer.**
  Full stack: the app on iOS and Android, and the backend.
- **Freelance specialists when needed.**
  Brought in for single tasks, so the core stays small and fast.

Company and technology

- **Shabake OÜ, Estonia.**
  Registry code 17411629. Eduplica is its games brand.
- **One codebase for both stores.**
  React Native and Expo; iOS and Android release together.
- **Serverless backend on AWS.**
  API Gateway and Lambda.
- **Self-funded to date.**
  By the founder and two silent partners.

THE ASK

We are looking for one partner to scale it with.

OPTION 1

Publishing partner

A publisher who funds and runs user acquisition, and brings puzzle expertise to growth and monetisation.

OPTION 2

$100K to $150K

An angel round in the first half of 2027, for new content and a US scale test.
